

105TH CONGRESS
2D SESSION

H. CON. RES. 334

Relating to Taiwan's participation in the World Health Organization.

IN THE HOUSE OF REPRESENTATIVES

OCTOBER 7, 1998

Mr. SOLOMON (for himself, Mr. GILMAN, Mr. BEREUTER, and Mr. BROWN of Ohio) submitted the following concurrent resolution; which was referred to the Committee on International Relations

CONCURRENT RESOLUTION

Relating to Taiwan's participation in the World Health Organization.

Whereas good health is a basic right for every citizen of the world and access to the highest standards of health information and services is necessary to help guarantee this right;

Whereas direct and unobstructed participation in international health cooperation forums and programs is therefore crucial, especially with today's greater potential for the cross-border spread of various infectious diseases such as AIDS and Hong Kong bird flu through increased trade and travel;

Whereas the World Health Organization (WHO) set forth in the first chapter of its charter the objective of attaining the highest possible level of health for all people;

Whereas in 1977 the World Health Organization established “Health for all by the year 2000” as its overriding priority and reaffirmed that central vision with the initiation of its “Health For All” renewal process in 1995;

Whereas Taiwan’s population of 21,000,000 people is larger than that of $\frac{3}{4}$ of the member states already in the World Health Organization and shares the noble goals of the organization;

Whereas Taiwan’s achievements in the field of health are substantial, including one of the highest life expectancy levels in Asia, maternal and infant mortality rates comparable to those of western countries, the eradication of such infectious diseases as cholera, smallpox, and the plague, the first Asian nation to be rid of polio, and the first country in the world to provide children with free hepatitis B vaccinations;

Whereas prior to 1972 and its loss of membership in the World Health Organization, Taiwan sent specialists to serve in other member countries on countless health projects and its health experts held key positions in the organization, all to the benefit of the entire Pacific region;

Whereas Taiwan is not allowed to participate in any WHO-organized forums and workshops concerning the latest technologies in the diagnosis, monitoring, and control of diseases;

Whereas in recent years both the Taiwanese Government and individual Taiwanese experts have expressed a willingness to assist financially or technically in WHO-supported international aid and health activities, but have ultimately been unable to render such assistance;

Whereas according to the constitution of the World Health Organization, Taiwan does not fulfill the criteria for membership;

Whereas the World Health Organization does allow observers to participate in the activities of the organization; and

Whereas in light of all of the benefits that such participation could bring to the state of health not only in Taiwan, but also regionally and globally: Now, therefore, be it

1 *Resolved by the House of Representatives (the Senate*
2 *concurring)*, That it is the sense of the Congress that—

3 (1) Taiwan and its 21,000,000 people should
4 have appropriate and meaningful participation in the
5 World Health Organization; and

6 (2) it should be United States policy to pursue
7 some initiative in the World Health Organization
8 which will give Taiwan meaningful participation in a
9 manner that is consistent with such organization's
10 requirements.
